Date : 11/11/2019

To: All Parents

From: The Principal

Subject: Invitation for the Mega Project

Dear Parents,

Greetings from Redbricks Education Foundation!

We take great pleasure in inviting you to a Children's Work Exhibition on **"Exploring Creative Thinking and Imagination," "Exploring our Visual Spatial Intelligence" and "Exploring our Visual Spatial Intelligence"** put together by the students of Redbricks. Through this exhibition, we aim to convey the learning and developmental processes that children go through, under the **Inquiry-based & Project-based teaching learning approaches.**

The exhibition will be a culmination of the work done by **Pre-schoolers (1.5 to 5.5 year olds) on "Exploring Creative Thinking and Imagination."** These projects were undertaken to help children inquire and learn, while developing important attitudes, processes and skills. The discovery and creation processes of children will be displayed in the exhibition, along with the various products that evolved throughout the project journey.

The exhibition will also display the work of **Primary school children (1st to 4th graders) on "Exploring our Visual Spatial Intelligence and Linguistic Intelligence."** These projects were conducted under their 'Interest Centers' program, with a focus on exploring the Theory of Multiple Intelligences which states that people do not have just an intellectual capacity, but have many kinds of intelligence .

This 2 day Exhibition will be held on the **16th (Saturday) and 17th (Sunday) of November 2019** at **079 Stories, Bodakdev, Ahmedabad.**

The exhibition is sure to ignite inquisitiveness and interest in children as well as adults, especially educators and parents.

We would be highly motivated if you would visit our exhibition and, also encourage friends and family to do the same.

Please find enclosed here the invitation card with more details.

Sincerely,

Mrs. Sutapa Mishra

The Principal
